Education

Ajay Kumar Garg Engineering College, Ghaziabad

Oct 2023 – Jun 2026

B.Tech in Computer Science & Engineering

- GPA: 7.68 / 10

Lucknow Polytechnic, Lucknow

Nov 2020 – Jul 2023

Diploma in Mechanical Engineering

- Percentage: 71.52%

Technical Skills

Languages	: Java, JavaScript (ES6+), Python
Frontend	: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Context API
Backend	: Node.js, Express.js, REST APIs, JWT Authentication, bcrypt
Databases	: MongoDB, MySQL, Appwrite
Developer Tools	: Git, GitHub, Postman, VS Code, IntelliJ IDEA, Vercel, Railway, Render
Core CS	: OOP, DBMS, Operating Systems, Computer Networks, SDLC, REST API Design, Basic System Design

Experience

Zidio Development [🔗](#)

Remote

Web Development Intern

Jun 2025 – Sep 2025

- Developed full-stack MERN applications with authentication, CRUD operations, REST API integration, and responsive user interfaces.
- Configured **JWT-based auth** with session management and Express middleware for route protection across all three apps.
- Designed **MongoDB** schemas for users, posts, products, and orders; used **MySQL** for relational data; applied input validation and a centralized error handler on all routes.

Edunet Foundation, AICTE [🔗](#)

Remote

IBM SkillsBuild Intern

Jul 2025 – Aug 2025

- Trained a Crop Yield Prediction model using **IBM AutoAI** on real-world agricultural datasets; the best pipeline (**Random Forest**) reached **92% accuracy** after automated feature selection and hyperparameter search on IBM Cloud.
- Deployed an eligibility classification system for the **NSAP welfare scheme** on **Watsonx.ai Studio**, classifying district-level beneficiary data into three pension categories (IGNOAPS, IGNWPS, IGNDPS) with **94.8% accuracy**.
- Automated data preprocessing, feature engineering, and model deployment steps on IBM Cloud, cutting manual pipeline steps by ~60%.

Projects

TaskFlow Pro – Project Management SaaS

[GitHub](#) [🔗](#) — [Live Demo](#) [🔗](#)

React.js, Node.js, Express, MongoDB, Mongoose, JWT, Tailwind CSS, Railway

- Implemented **role-based access control** (Admin / Manager / User) with **JWT** authentication, a Kanban drag-and-drop task board, and a dashboard showing project KPIs and overdue work.
- Exposed 20+ REST API endpoints across Projects, Tasks, Users, and Dashboard modules; protected routes via **Express middleware** with CORS config and request validation on all inputs.
- Structured frontend (**React + Tailwind CSS**) and backend (**Express + Mongoose**) as a monorepo with seed scripts and .env-based config; deployed backend on **Railway**, frontend on **Vercel**.

RiverFlow – Q&A Platform

[GitHub](#) [🔗](#) — [Live Demo](#) [🔗](#)

Next.js (App Router), Appwrite, Tailwind CSS, JavaScript

- Engineered **RiverFlow**, a Q&A platform using **Next.js App Router** — server-side rendering, dynamic routes, and a modular component structure covering 5+ entity types (questions, answers, comments, votes, tags).
- Modelled an **Appwrite** database schema with relational mapping and indexed queries; configured **Appwrite Auth** for user login, session management, and protected routes.
- Integrated markdown parsing, code syntax highlighting, and optimistic vote count updates on the frontend.

Achievements

- Solved **350+ Data Structures and Algorithms problems** across LeetCode, GeeksforGeeks, and CodeChef covering arrays, trees, dynamic programming, graphs, and algorithm optimization.
